

An Intermediate Photography Workshop

CREATE BETTER IMAGES

In-demand wedding and portrait photographers Jennifer Bowen and Kimberly Jarman will share useful tips and technical know-how for creating images that pop.

ONLY 20 SEATS AVAILABLE

About the Workshop

This workshop is for those who understand photography fundamentals, as it will build upon the knowledge of shooting manually and understanding the relationship between ISO, aperture and shutter speed. We will review these skills and more through live practice during an outdoor model photo shoot. We will have two models (a toddler and a high school senior) and will divide into two groups for the live shoot portion, with all participants having the chance to work with both models. This workshop will be very hands-on! After the shoot, you will actually process your images via Adobe Lightroom and Photoshop and share a few of them. We will also review shooting techniques, posing suggestions, and go very in-depth with the actual shooting process and well as have time for Q&A.

Light snacks and drinks included.

Please bring a digital SLR camera for this workshop, as well as bring any lenses you have. We also ask that you bring a laptop since you will be processing your images. If you do not have a laptop, please let us know.
